## PROFESSIONAL SUMMARY

Business Information Systems student and aspiring Software & Data Engineer with hands-on experience in full-stack web development, Python back-end development, data pipelines, and AI-powered applications. Trained through DEPI, NTI, ITIDA, IBM, and FlyRank AI, building and deploying end-to-end projects with React, TypeScript, Node.js, Flask, and Google Cloud Run. Currently architecting production front-end systems for LLM-driven workflows at FlyRank AI. Seeking a junior Software Engineer, Full-Stack, or Data Engineer role.

## SKILLS

**Languages:** JavaScript, TypeScript, Python, HTML5, CSS3
**Front-End:** React 19, Vite, Tailwind CSS, Responsive Design, Bilingual RTL/LTR Interfaces
**Back-End:** Node.js, Express.js, Flask, REST APIs
**Data Engineering:** Data Pipelines, ETL, Data Analysis, Data Visualization
**Cloud & AI:** Google Cloud Run, Vertex AI, AWS Bedrock, Anthropic Claude API, Prompt Engineering, Model Context Protocol (MCP)
**Tools:** Git, GitHub, GitHub Copilot

## PROFESSIONAL EXPERIENCE

**FlyRank AI**
*Internship · Chicago, Illinois, United States · Remote*

- **Front-End AI Engineering** *Oct 2026 – Present · 1 mo*
  - Architect high-performance, pixel-perfect user interfaces engineered for complex LLM workflows and AI-driven applications.
  - Integrate asynchronous backend AI APIs and streaming endpoints to dynamically render real-time model outputs into scalable UI components.
  - Optimize frontend state management and client-side rendering latency for seamless, responsive AI tool experiences.
- **Backend AI Engineering** *Jun 2026 – Oct 2026 · 5 mos*
  - Contributed to backend systems powering AI-driven organic growth and generative engine optimization (GEO) tools.
  - Collaborated with engineering teams to automate brand visibility across traditional and AI-powered search engines.

**Data Engineer – Digital Egypt Pioneers Initiative (DEPI), Batch R5** *Jul 2026 – Present*
*Alexandria, Egypt*

- Completing an intensive Data Engineering specialization in building high-performance, scalable data systems.
- Apply data pipeline and ETL concepts to real-world projects connecting business operations with technical architecture.

**Python Developer – National Telecommunication Institute (NTI)** *Aug 2026 – Sep 2026*

- Built Python-based solutions and optimized application performance (NTI & ITIDA Summer Training Program).

**Participant – Kanz AI Training Hackathon** *Jul 2026*

- Engineered AI prototypes with ML frameworks and generative AI, designing backend logic and scalable architecture.

**Freelance Program Participant – ITIDA Gigs** *Mar 2026 – Jun 2026*
*Giza, Egypt*

- Completed the ITIDA Gigs Freelance Qualification Program, delivering web development solutions to clients.

**Web Development Intern – PathLine Training Academy** *Feb 2026 – Jul 2026*
*Cairo, Egypt*

- Built real-world front-end projects and expanded a portfolio through HTML5/CSS3 responsive design coursework.

**Tech for Non-Techies Trainee – iCareer** *Nov 2025 – Dec 2025*
*Alexandria, Egypt*

- Trained on digital tools, workflow automation, and AI to streamline processes and improve efficiency.

## PROJECTS

**FarmFlow – Python Farm-to-Consumer Commerce & Inventory System** *NTI | Python, Backend Architecture*
Engineered during NTI Summer Internship to streamline direct farm-to-consumer sales, eliminate intermediaries, and optimize inventory tracking and automated order management.

**VOLT – Sports Gear Store & High-Performance Analytics Platform** *Data Analysis & Visualization | 2026*
Architected a high-performance sports analytics platform delivering real-time actionable insights, athlete statistics, and deep historical trend analysis.

**HANY'S WORLD – Interactive Portfolio & Resume Platform** *React 19, TypeScript, Tailwind CSS, Google Cloud Run*
Built and deployed a bilingual EN/AR (RTL/LTR) portfolio with dual theming, skill-based filtering, and PDF resume export.

**Artisan Table – Restaurant Web Platform** *Full-Stack | Jul 2026*
Built a dynamic menu engine, online reservation system, and feedback pipeline optimized for responsive performance.

## EDUCATION

**Bachelor of Business Information Systems – Aboukir High Institutes** *Sep 2025 – May 2029*

**Non-Degree Course (GCI World): Global Creative Leaders – Data Science & AI Program – The University of Tokyo** *Sep 2026*

**Higher National Diploma – Victoria College, Alexandria** *Sep 2010 – Aug 2025*

## CERTIFICATIONS

**Software Engineering, Data & Cloud – IBM / Coursera:** Developing AI Applications with Python and Flask, Python for Data Science, AI & Development, Developing Back-End Apps with Node.js and Express, Developing Front-End Apps with React, Getting Started with Git and GitHub, Introduction to Cloud Computing, Introduction to Software Engineering.

**AI Engineering, Claude & Cloud – Anthropic / AWS / Other:** Building with the Claude API, Claude with Google Vertex AI, Claude with Amazon Bedrock, Introduction to Model Context Protocol, Model Context Protocol: Advanced Topics, AI Capabilities and Limitations, AI Fluency: Framework & Foundations, AI Fluency for Builders, AI Fluency for Students, Software Engineering Essentials, AWS AI Practitioner Challenge - Udacity, Vibe Coding with GitHub Copilot - Edureka.
